

Tegile Systems Presents at Piper Jaffray Technology, Media & Telecommunications Conference

Newark, Calif. – March 5, 2014 – [Tegile Systems](#), the leading provider of flash-driven storage arrays for virtualized server and virtual desktop environments, today announced its Vice President of Marketing, Rob Commins, will present at the invitation-only Piper Jaffray Technology, Media & Telecommunications Conference, held in New York City March 11-12.

Piper Jaffray technology research analysts will lead fireside chats and panel discussions with top executives from more than 100 companies to provide insight, perspective and opportunities to those in the investment banking and asset management communities. Tegile will participate in the conference's Storage Superdome Panel March 11 at 9 a.m. EDT.

"Conferences for and by the investment community, like the Piper Jaffray Technology, Media & Telecommunications Conference, are important venues to disseminate the latest news and information about the constantly evolving storage marketplace in general as well as the advances we continue to make as a company," said Commins. "Armed with this knowledge, financial advisors have the insight they need to better understand the direction of the technology industry and how that progress will impact dozens of other industries in terms of their ability to manage their growing data storage needs today and into the future."

Tegile's [Zebi™](#) hybrid arrays are a technology and market favorite that satisfy the demand for performance at solid-state speeds, with the capacity and cost advantages of hard disk storage. Zebi arrays are significantly faster than legacy arrays, and significantly less expensive than all solid-state disk-based arrays. Featuring both NAS and SAN connectivity, they are easy to use, fully redundant, highly scalable, and come complete with built-in snapshot, replication, near-instant recovery, and virtualization management features.

Piper Jaffray hosts several client conferences and events each year focusing on clean technology & renewables, consumer, healthcare, industrials and technology, media & telecommunications with the goal of bringing together key industry executives, investors and its own professionals to provide multiple perspectives, investigate critical trends and identify the leaders in the markets that are driving the economy. Topics discussed at the Technology, Media & Telecommunications cover 3D printing, cloud computing, the Internet of things, wearable technology, big data & analytics, the sharing economy, mobile/social, content delivery & consumption, the optical upgrade cycle, connected cars, next-generation security & storage architectures, software-defined networking, electronic & alternative payments, business & learning services, semiconductor

intellectual property, over-the-top content and other disruptive waves reshaping the technology landscape.

About Tegile Systems

Tegile Systems is pioneering a new generation of flash-driven enterprise storage arrays that balance performance, capacity, features and price for virtualization, file services and database applications. With Tegile's Zebi line of hybrid storage arrays, the company is redefining the traditional approach to storage by providing a family of arrays that is significantly faster than all hard disk-based arrays and significantly less expensive than all solid-state disk-based arrays.

Tegile's patent-pending MASS technology accelerates the Zebi's performance and enables on-the-fly de-duplication and compression of data so each Zebi has a usable capacity far greater than its raw capacity. Tegile's award-winning technology solutions enable customers to better address the requirements of server virtualization, virtual desktop integration and database integration than other offerings. Featuring both NAS and SAN connectivity, Tegile arrays are easy-to-use, fully redundant, and highly scalable. They come complete with built-in auto-snapshot, auto-replication, near-instant recovery, onsite or offsite failover, and virtualization management features.
